

INTERNET OF THINGS TASK DETAILS

IoT has the power to change our world. From cities and transportation to the resources we farm, emerging IoT technologies are set to make everyday processes more integrated and easier.

Thanks to IoT, we can:

- reduce waste and improve service delivery,
- create good ideas for disabled persons and seniors,
- have control of hospitals resources,
- make optimization in patient care,
- automobiles operate,
- save our time and money.

IoT helps us work smarter, live smarter, and gain complete control over our lives, but it's also supporting our wellbeing behind the scenes. And it is just the beginning!

Now you can show how IoT can make our lives easier.

Create a project that will help to change the status quo! The floor is all yours – it could be just an idea, an app, a board game, a concept you have in your head, or something totally awesome – this task has no barriers! All you need to do is prepare things from the list below to help in the assessment. Need some inspiration?

- Reduce light and energy waste
- Home-appliances management
- Unique ways to use smartwatch-generated data
- New methods for security in the future
- Go crazy – there are no barriers to this task!

The task submitted for evaluation must include

- project title
- team name
- team members
- project description
- maximum 10-slides PDF presentation

The task submitted for evaluation could include the following:

- snapshots
- code repository
- demo links
- graphic materials
- other materials related to the project

The task solutions should be submitted to the platform Challenge Rocket in English only.
